

## Saving Water

There are many smart ways in using water in your business. Whether you have an office or a warehouse, there is a suitable solution for you.

### **Target 155: Support program to target business water use**

Following the launch of the "Target 155" campaign, which urges Melburnians to reduce average residential consumption to less than 155 litres per person per day, a support program has been developed to encourage business to further cut water usage.

The *Support 155 Business Program* is aimed at business customers that use less than 10 million litres of water a year and encourages these businesses to assess their water use and develop actions to use water more efficiently around the workplace. Through this program, business customers will be asked to demonstrate their commitment to saving water by registering for the program on Yarra Valley Water's website [www.yvw.com.au](http://www.yvw.com.au) and they will then be provided with a resource kit that contains a range of materials to help them reduce their water usage.

Tony Kelly, Yarra Valley Water Managing Director and Industry Spokesperson for Restrictions, said the *Support 155 Business Program* would help to ensure industry and households were continuing to work together to secure Melbourne's water supplies.

[Register now](#) and pledge your commitment to Support 155 and access a number of resources to help save water within your business.

### **savewater!® Alliance**

The savewater!® Alliance works with member water businesses, government agencies and product companies to deliver water conservation programs throughout Australia. savewater!® offers a combination of web resources and practical programs to help all Australians change the way they use water.

Visit savewater!® website which offers:

- Handy tips and case studies for a range of industry types
- Water and energy efficient products
- Research and resource information
